

## Smart Fix

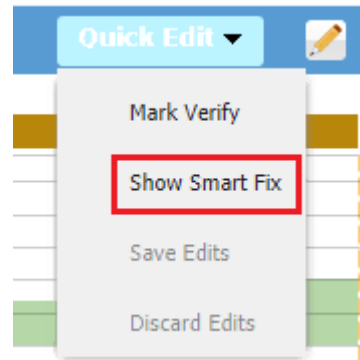

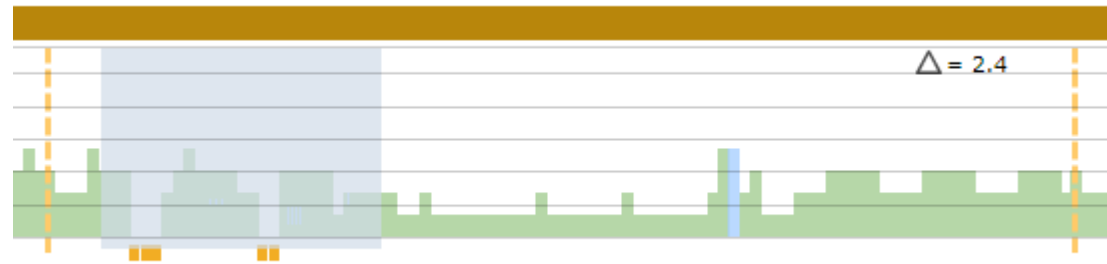

Highlight all **orange sections** within the one-day interval reads.

Sections highlighted must appear between **interval read lines**.

Avoid highlighting intervals from a previous read, as this may skew intervals for estimating.

Hover over **Quick Edit** button.

Click **Show Smart Fix**.

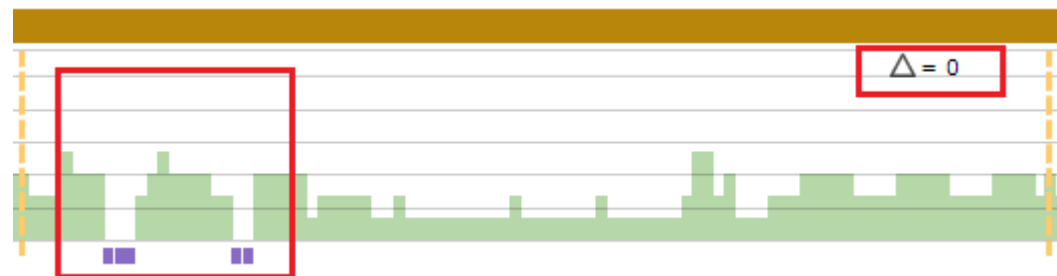

*Note: If the Smart Fix button does not enable, restart the highlighting process and try again. The system is unable to estimate the highlighted intervals and the Values to Fix will show NVE (0).*

<b>Values to fix:</b>	<input checked="" type="checkbox"/> NVE (0)	<input type="checkbox"/> VAL (0)
	<input type="checkbox"/> EST (0)	<input type="checkbox"/> Others (0)

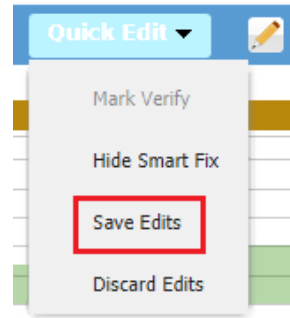

Click the **Smart Fix** button.  
The estimated area will appear in **purple**, but does not show individual intervals.

Check the **Delta number** to see if it is close to zero (0).

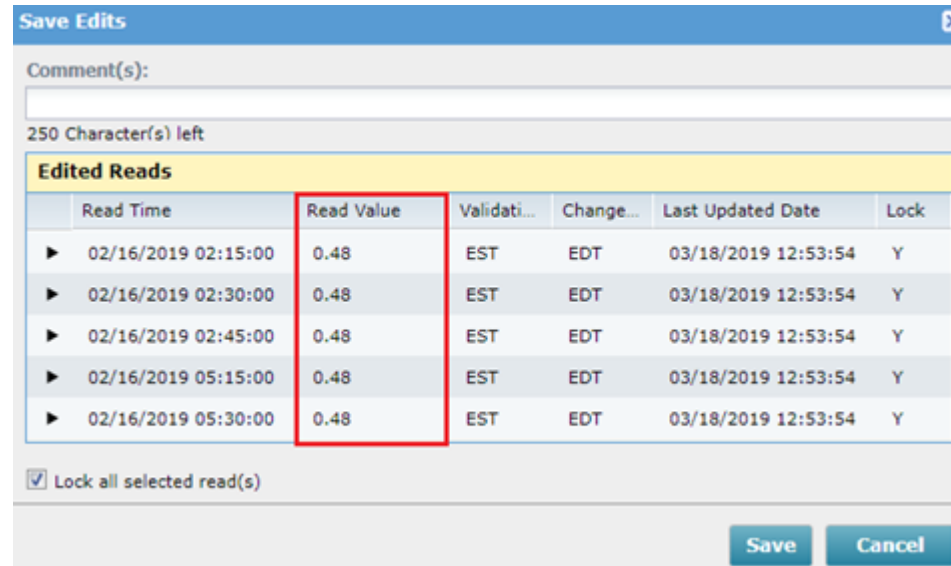

Hover over **Quick Edit** button.

Click **Save Edits**.

A pop-up window opens displaying the estimated interval read values.

Compare the estimated read values in the popup window to the read values on the left side of the graph to make sure they are reasonable and line up with other reads.

The screenshot displays a software interface with a 'Zoomed' graph on the left and an 'Edited Reads' popup window on the right. The graph shows a 'KWH Del 15 Interval Read' scale with values 0, 0.24, 0.48, 0.72, and 0.96. The 'Edited Reads' popup window contains a table with the following data:

Read Time	Read Value	Validati...	Change...	Last Updated Date	Lock
▶ 02/16/2019 02:15:00	0.48	EST	EDT	03/18/2019 12:53:54	Y
▶ 02/16/2019 02:30:00	0.48	EST	EDT	03/18/2019 12:53:54	Y
▶ 02/16/2019 02:45:00	0.48	EST	EDT	03/18/2019 12:53:54	Y
▶ 02/16/2019 05:15:00	0.48	EST	EDT	03/18/2019 12:53:54	Y
▶ 02/16/2019 05:30:00	0.48	EST	EDT	03/18/2019 12:53:54	Y

Below the table is a checkbox labeled 'Lock all selected read(s)' which is checked. At the bottom right of the popup are 'Save' and 'Cancel' buttons. A red arrow points from the '0.48' value in the 'Read Value' column of the table to the '0.48' value in the 'Read' section of the graph's scale.

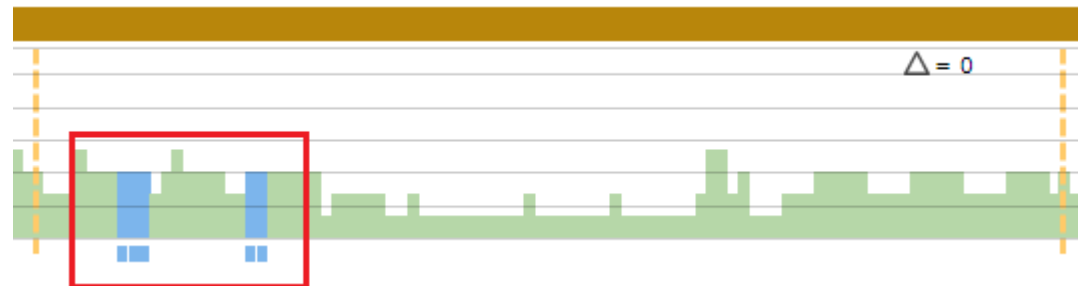

If the estimated read values are comparable to graphed values, click **Save**.
