

Joint Action Leadership Certification Program

Now Enrolling the Class of 2025

What is it?

An educational program for member utility leaders to become more acclimated to WPPI Energy, the joint action agency in which their utilities are member-owners. Join us to learn more about how our valuable partnership directly benefits your utility and community.

Who is it for?

- » The Joint Action Leadership Certification (JALC) is open to all member utility leaders and is geared toward utility managers and management staff. The JALC plus Board Certification is for those on the WPPI board as directors and alternates.
- » **Upon completion, participants will receive:**
 - » JALC graduates will receive a \$1,500 stipend toward an American Public Power Association certification program, webinar series or conference. JALC graduates with Board Certification will receive a \$2,000 stipend
 - » Framed certificate and lapel pin
 - » WPPI recognition and a news release for local use

Why consider?

- » **Professional development.** Enrollees will gain new information and knowledge about the electric industry, public power and WPPI as a power supplier, services provider and policy advocate.
- » **Leadership opportunities.** Education obtained through the program will help enrollees expand knowledge of the electric industry, public power, WPPI and the partnership with members. Into the future, there will be a continued need for active and engaged members to become the next generation of leaders. This coursework will provide a solid foundation.
- » **Networking.** Through WPPI, our 51 members share a common mission. Enrollees will establish a broader network of peers and colleagues that can be tremendously valuable.

Program Modules

Attend minimum of 4 of 6 most recent Board meetings

- » The program is designed to take a minimum of two years to complete.
- » WPPI will hold a minimum of two modules per year on a rotating basis.
- » Those interested can also participate in modules a la carte without enrolling in the Class of 2025.
